Stage 2 - you should see around 500-520ps and 650-700nm

We would require a £1,500 deposit to secure parts and booking, and for the car to be left with us for a couple of days to carry out the work.

Please make sure your car arrives with at least half a tank of fuel and is always run on the best fuel, either Tesco 99 Momentum or Shell Vpower

Please be aware that old coilpacks can fail when running more power, causing a misfire, please make sure you have newest revision coilpacks before booking in, or let us know and we can add these to the estimate and replace on the day.

Due to Design of Turbo Waste Gate fitting a decat can cause metallic rattle to be heard more than the OE Cat Downpipe

If your car is being left with us, please do not collect/ or plan to collect your car unless told so, we do not want to rush the work we are carrying out on your car, we will let you know as soon as your car is finished, we have completed our final checks and we are happy with your car.
